PROFILE

Dedicated IT Specialist with a proven track record in troubleshooting hardware, managing networks, and delivering reliable technical solutions. I bring over a year of hands-on experience diagnosing computers, laptops, and electronic devices, having successfully managed a technical repair service during college. Beyond traditional IT support, I possess strong software engineering and system administration capabilities, proficient in Linux and backend development. My technical toolkit includes Python scripting, web automation, reverse engineering, and deploying AI-integrated applications. I thrive at the intersection of hardware maintenance and software automation to maximize efficiency.

EXPERIENCE

PT Pengusahaan Daerah Industri Pulau Batam (Persero)

Nov 2025 Apr 2026

IT Unit Hardware (Internship)

Batam, Indonesia

- " Performed troubleshooting and maintenance of PCs, peripherals, and network hardware for smooth IT operations.
- " Assisted in supporting internal users across departments, resolving technical issues related to hardware & access.
- " Developed and integrated internal system features including an overtime request & approval workflow via internal APIs.
- " Managed and updated IT asset documentation, including maintenance records, handover logs, and inventory tracking.

PT. Pacific Medan Industri

Feb 2024 Jun 2024

IT Support (Internship)

Medan, Indonesia

- " Handled daily end-user technical issues related to desktops, laptops, industrial printers, and office suites.
- " Installed, configured, and maintained hardware and software systems following strict corporate IT standards.
- " Provided remote and on-site technical support, minimizing downtime and ensuring business continuity.
- " Assisted in basic network troubleshooting including LAN connectivity, IP configuration, and service checks.
- " Implemented network and device monitoring using Zabbix, enabling early detection of system anomalies.

Dinas Komunikasi Dan Informatika

Dec 2023 Feb 2024

Network Administrator (Internship)

Medan, Indonesia

- " Assisted in designing, implementing, and maintaining network infrastructure across multiple departments.
- " Configured and maintained routers, switches, IP addressing, and firewall rules to ensure secure connectivity.
- " Monitored network performance and generated technical telemetry reports for evaluation and optimization.
- " Supported troubleshooting of network issues and assisted senior engineers during maintenance activities.

Robobrick Lab

Jul 2023 Oct 2025

Robotic Teacher (Freelance)

Medan, Indonesia

- " Guided students through hands-on robotics and coding projects, cultivating computational thinking and STEM skills.
- " Designed and implemented curriculum for EV3, Arduino, and Scratch, fostering hands-on engineering capabilities.

Infinite Learning Indonesia

Aug 2023 Dec 2023

Hybrid Cloud & AI (Apprenticeship)

Batam, Indonesia

- " Gained practical experience in system administration focusing on Red Hat Enterprise Linux and hybrid cloud solutions.
- " Contributed to a Two-Factor Authentication Library System project, enhancing digital security controls.

PT. Telekomunikasi Indonesia Tbk

Jun 2019 Sep 2019

IT Support (Internship)

Medan, Indonesia

- " Provided technical support for hardware and software issues to internal users.
- " Assisted with system maintenance, updates, and upgrades to ensure optimal system performance.

EDUCATION

S1 Computer System STMIK Triguna Dharma (GPA 3.85 / 4.00)

2021 2025

Graduated as Second-Best Student in the Department

Medan, Indonesia

- " Participant of Kampus Merdeka (MSIB) programs: Independent Study (Hybrid Cloud & AI) & Internship (Junior IT Support).
- " Actively involved in community service programs focused on technology, robotics, and basic electricity education.

CERTIFICATIONS

- " **Red Hat Certified System Administrator (RHCSA):** Proficient in RHEL operating systems, configuration, security hardening.
- " **Linux System Administrator:** Expertise in Linux systems troubleshooting, containerization, and network config.
- " **IBM Cybersecurity Advanced Certification:** Advanced knowledge of threat detection, incident response, security strategies.
- " **IBM AI Advanced Certification:** Proficient in AI algorithms, machine learning models, and real-world deployment.
- " **TOEFL iBT (Score 570):** Standardized English proficiency for technical documentation and international environments.

KEY ENGINEERING PROJECTS

Automated LEGO 9686 Sorting Machine with Computer Vision

Robotics, Computer Vision, YOLO, Orange Pi 4, Arduino Nano/Uno, Servo Mechanics

- " Architected and built a fully automated sorting machine using LEGO 9686 kit with motorized conveyor & servo gates.
- " Trained and deployed a YOLO deep learning vision model for real-time object detection and part geometry classification.
- " Designed distributed architecture: Orange Pi 4 executes inference and serial commands trigger Arduino actuation.

AI-Powered Manga Localization Browser Extension (Micro-SaaS)

Browser Extension, YOLO Object Detection, OCR Extraction, Contextual LLMs, Inpainting

- " Engineered in-browser pipeline detecting speech bubbles directly on manga canvas panels using YOLO vision models.
- " Integrated OCR character extraction and contextual AI translation engines to maintain narrative flow and nuance.
- " Implemented automated in-place canvas inpainting and dynamic typographic typesetting preserving original art layout.

ORGANIZATIONS & LEADERSHIP

Multimedia Organization STMIK Triguna Dharma

Jun 2021 Jul 2023

- " Directed short video productions, camera operations, promotional digital design, and sponsor partnerships.

Komunitas Pendakwah Keren (KPK)

Jun 2022 Dec 2022

- " Delivered workstation troubleshooting, hardware setup, network reliability, and event documentation.

TECHNICAL SKILLS

Languages: Indonesian (Native), English (Professional Working Proficiency - TOEFL 570)

Software & AI: Python, Arduino IDE, YOLO, OpenCV, Cisco Packet Tracer, Git, Web Automation

Networking: TCP/IP, DNS, DHCP, VPN, Routing & Switching, Firewalls, MikroTik, Subnetting

Systems: Red Hat Enterprise Linux (RHCSA), Windows Server, Zabbix Monitoring, Bash Scripting
